
NECC Logo Usage Guide

NECC logo fundamentals

The NECC Logo Usage Guide is intended to be a quick reference for logo usage, official colors, and typefaces. In order to maintain consistency in NECC's branding, please adhere to the guidelines presented in this document. The logo should never be altered.

If you have additional needs that are not addressed in this guide, such as a member of the Marketing Communications office connecting with a vendor for specific issues, or you would like a copy of the NECC logo, please contact Susan Stehfest at sstehfest@necc.mass.edu or 978-556-3953.

THE LOGO STANDARD CONFIGURATION

FILE NAME: NECC_GradientShield_logo2010

The use of the primary wordmark and symbol appears above.

STANDARD USES AND FILE FORMATS

For most uses (placing the logo into a document, powerpoint presentation, or online), the full color logo should be used.

Please note: the logo should NEVER appear with a white box behind it. If this occurs the wrong file format has been used (please use .tif, .png, or .gif— see below for details).

Also, it is best to *place* the logo into documents, as opposed to attempting to open it. Unless you have the correct version of the program and that it was created in, you will not be able to open it.

A brief overview of file formats:

TIFF (.tif)	Best for use in print media. Will have a transparent background when placed on a colored background.
EPS (.eps)	Best for use in print media. Will have a transparent background when placed on a colored background or layered on top of another image. A benefit to it's use is that it will never appear to have a jagged edge (ie: pixelated) in it's use at any size. An eps should always be used if the logo is to be reproduced at very large size.
JPEG (.jpg)	Typically best for online use, not print media. Will appear with a white box behind the image if placed on anything other than a white background. A benefit to it's use is that it will have a small file size (amount of memory used).
PNG (.png)	Best for online use. Will have a transparent background when placed on a colored background or layered on top of another image.
GIF (.gif)	Best for online use. Also will have a transparent background when placed on a colored background or layered on top of another image. The quality of a gif will be higher than that of a png when used at a very small size.

NECC logo fundamentals

LOGO COLORS

Using consistent colors in an important way to bring coherence to NECC's image. The full color logo can be used in its true form against light colored backgrounds (use logo shown on page 2, file: NECC_blue_gold_logo2010). On dark colored backgrounds, the logo(s) with white lettering should be used (see logos on dark backgrounds on page 6). The logo should never be altered.

If you are working with an external vendor, please provide them with the appropriate color information provided in the chart below to ensure that the college's standards are met.

	PMS	CMYK	RGB	HTML
	280	C100 M72 Y0 K18	R0 G73 B144	004990
	124	C0 M28 Y100 K6	R238 G178 B17	eeb211
	Black	K100	R0 G0 B0	000000

PMS (Pantone Matching System)

Specific ink colors used in print media

CMYK (Cyan, Magenta, Yellow, Black)

Colors made up of a compilation of cyan, magenta, yellow and black for print media

RGB (Red, Green, Blue)

Colors made up of Red, Green and Blue used in online media

HTML (Hyper Text Markup Language)

HTML colors are designated by letters and numbers for online media

SHIELD SYMBOL WITH NECC ACRONYM

The 'shield symbol' portion of the logo with the NECC acronym can be used without the wordmark only under certain circumstances.

Use of the shield symbol with the NECC acronym is allowed only on a case-by-case basis and must be evaluated by the Marketing Communications office. Please contact them directly to obtain permission.
